

Factsheet

Weaverine Textile

Weaverine is a premium textile manufacturer with over 30 years of experience specializing in 100% polyester home and fashion fabrics. The company operates a modern 47-mu facility in Wuhe County, Bengbu City, Anhui Province, China, serving global brands with high-performance, sustainable textile solutions.

Production Capabilities

Weaverine operates over 600 advanced water-jet looms with fully integrated production from yarn through weaving, dyeing, and finishing. This vertical integration ensures consistent quality, customization flexibility, reduced lead times, and rapid response to market demands.

Production Metric	Capacity
Daily Production	200,000+ meters
Annual Production	73+ million meters
Fabric Width Range	160–330 cm
Equipment	600+ water-jet looms

Product Portfolio

Weaverine offers a comprehensive range of 100% polyester fabrics with emphasis on sustainability, functionality, and customization.

- **Peachskin Fabrics :** Flagship product featuring signature soft, brushed texture. Highly sought after for garments, bedding, curtains, and upholstery. Available in various weights and finishes. ★
- **Recycled Polyester:** GRS-certified fabrics from recycled PET materials meeting European and North American sustainability standards. ★
- **Embossed Fabrics:** 3D textured patterns via high-temperature roller technology. Extensive mold library with custom development available for curtains, cushions, and upholstery.
- **Three-Proof Performance:** Waterproof, oil-proof, and stain-resistant treatments maintaining properties through multiple washes. Ideal for commercial upholstery, hospitality, and high-traffic use.
- **Digital & Rotary Print:** Digital printing for small batches and rapid prototyping; rotary printing for cost-effective large-scale runs.
- **Specialized Finishes:** Blackout/dim-out, moisture-wicking, antimicrobial, and flame-retardant treatments available.

Certifications and Quality Standards

GRS (Global Recycled Standard): Verifies recycled content, chain of custody, and environmental practices—valued in European markets.

OEKO-TEX Standard 100: Certifies fabrics are free from harmful substances and safe for direct skin contact.

Global Markets and Customer Services

Weaverine serves customers across Europe, North America, and Asia, specializing in certified sustainable and high-performance textiles for markets with stringent environmental and safety standards.

Target Customer

- Global fashion brands seeking innovative fabrics and sustainable materials
- Home textile manufacturers requiring consistent quality and scalable production
- Wholesale distributors and importers serving retail channels
- Interior design firms and hospitality sector buyers
- Contract furnishing suppliers for commercial projects

Value-Added Services

- **Free Sample Development:** Custom sampling based on client designs or specifications, with rapid turnaround
- **Factory Audits Welcomed:** Transparent operations open for client audits and quality inspections
- **Flexible Trade Terms:** Support for FOB, CIF, and other international trade arrangements
- **Technical Support:** Expert consultation on fabric selection, performance specifications, and applications
- **Custom Product Development:** Collaborative approach to developing fabrics meeting specific requirements
